HYPD Q3 2026
Earnings Supplement

hyperion defi

More than just HYPE.

NASDAQ: HYPD

Hyperion DeFi © 2026

Use of Non-GAAP Financial Measures

This presentation includes certain non-GAAP financial measures (including on a forward-looking basis) such as Adjusted Gross Profit, Gross HYPE Holdings, Net Asset Value, Operating Expenses Excluding Stock-Based Compensation, Core Operating Earnings, Treasury Gains (Losses), Adjusted Other Income (Expense), Adjusted EBITDA, Adjusted Net Investing Cash Flow, and Adjusted Net Operating Cash Flow. These non-GAAP measures are in addition to, and not a substitute for or superior to, measures of financial performance prepared in accordance with GAAP and should not be considered as an alternative to any performance measures derived in accordance with GAAP. Reconciliations of non-GAAP measures to their most directly comparable U.S. Generally Accepted Accounting Principles (GAAP) counterparts are included in the Financial Supplement - Non-GAAP Reconciliations section of this presentation with additional detail in the Footnotes. Hyperion DeFi believes that these non-GAAP measures of financial results (including on a forward-looking basis) provide useful supplemental information to investors about Hyperion DeFi. Hyperion DeFi's management uses non-GAAP measures to evaluate our operating performance, formulate business plans, help better assess our overall liquidity position, and make strategic decisions, including those relating to operating expenses and the allocation of internal resources. However, these non-GAAP measures have limitations as analytical tools. Other companies may not use these non-GAAP measures or may use similar measures that are defined in a different manner. Therefore, Hyperion DeFi's non-GAAP measures may not be directly comparable to similarly titled measures of other companies. We also periodically review our non-GAAP financial measures and may revise these measures to reflect changes in our business or otherwise. Additionally, forward-looking non-GAAP financial measures are presented on a non-GAAP basis without reconciliations of such forward-looking non-GAAP measures because the GAAP financial measures are not accessible on a forward-looking basis and reconciling information is not available without unreasonable effort due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliations, including adjustments reflected in our reconciliation of historic non-GAAP financial measures, the amounts of which, based on historical experience, could be material.

Figures in $		Q3 2025	Q4 2025	Q1 2026	Q2 2026	Q3 2026
GAAP	Gross Profit	302,506	192,987	244,271	357,693	810,415

Forward-Looking Statements

Except for historical information, all the statements, expectations and assumptions contained in this presentation are forward-looking statements. Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions or any other statements, our future activities or other future events or conditions, including the estimated market opportunities for our platform technology, the viability of, and risks associated with, our cryptocurrency treasury strategy, and the growth and revenue potential of the Hyperliquid ecosystem and the growth prospects of Hyperion DeFi, Inc. ("Hyperion DeFi", "Hyperion" or the "Company") (NASDAQ:HYPD). These statements are based on current expectations, estimates and projections about our business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may, and in some cases are likely to, differ materially from what is expressed or forecasted in the forward-looking statements due to numerous factors discussed from time to time in documents which we file with the U.S. Securities and Exchange Commission (the "SEC"), including in particular, the risks of our cryptocurrency strategy as detailed in our reports filed with the SEC.

Any forward-looking statements speak only as of the date on which they are made, and except as may be required under applicable securities laws, Hyperion DeFi does not undertake any obligation to update any forward-looking statements.

Disclaimer

Certain information contained in this presentation and statements made orally during the corresponding earnings call relate to or are based on studies, publications, surveys and other data obtained from third-party sources and Hyperion DeFi's own internal estimates and research. While Hyperion DeFi believes these third-party studies, publications, surveys and other data to be reliable as of the date of this presentation, it has not independently verified, and makes no representation as to the adequacy, fairness, accuracy or completeness of, any information obtained from third-party sources. In addition, no independent source has evaluated the reasonableness or accuracy of Hyperion DeFi's internal estimates or research and no reliance should be made on any information or statements made in this presentation relating to or based on such internal estimates and research. You should conduct your own investigation and analysis of Hyperion DeFi, its business, prospects, results of operations and financial condition. In furnishing this information, Hyperion DeFi does not undertake any obligation to provide you with access to any additional information (including forward-looking information and any projections contained herein) or to update or correct the information.

All figures in this presentation are not audited. Throughout this document, totals may not sum due to rounding. Calculations are based on unrounded results.

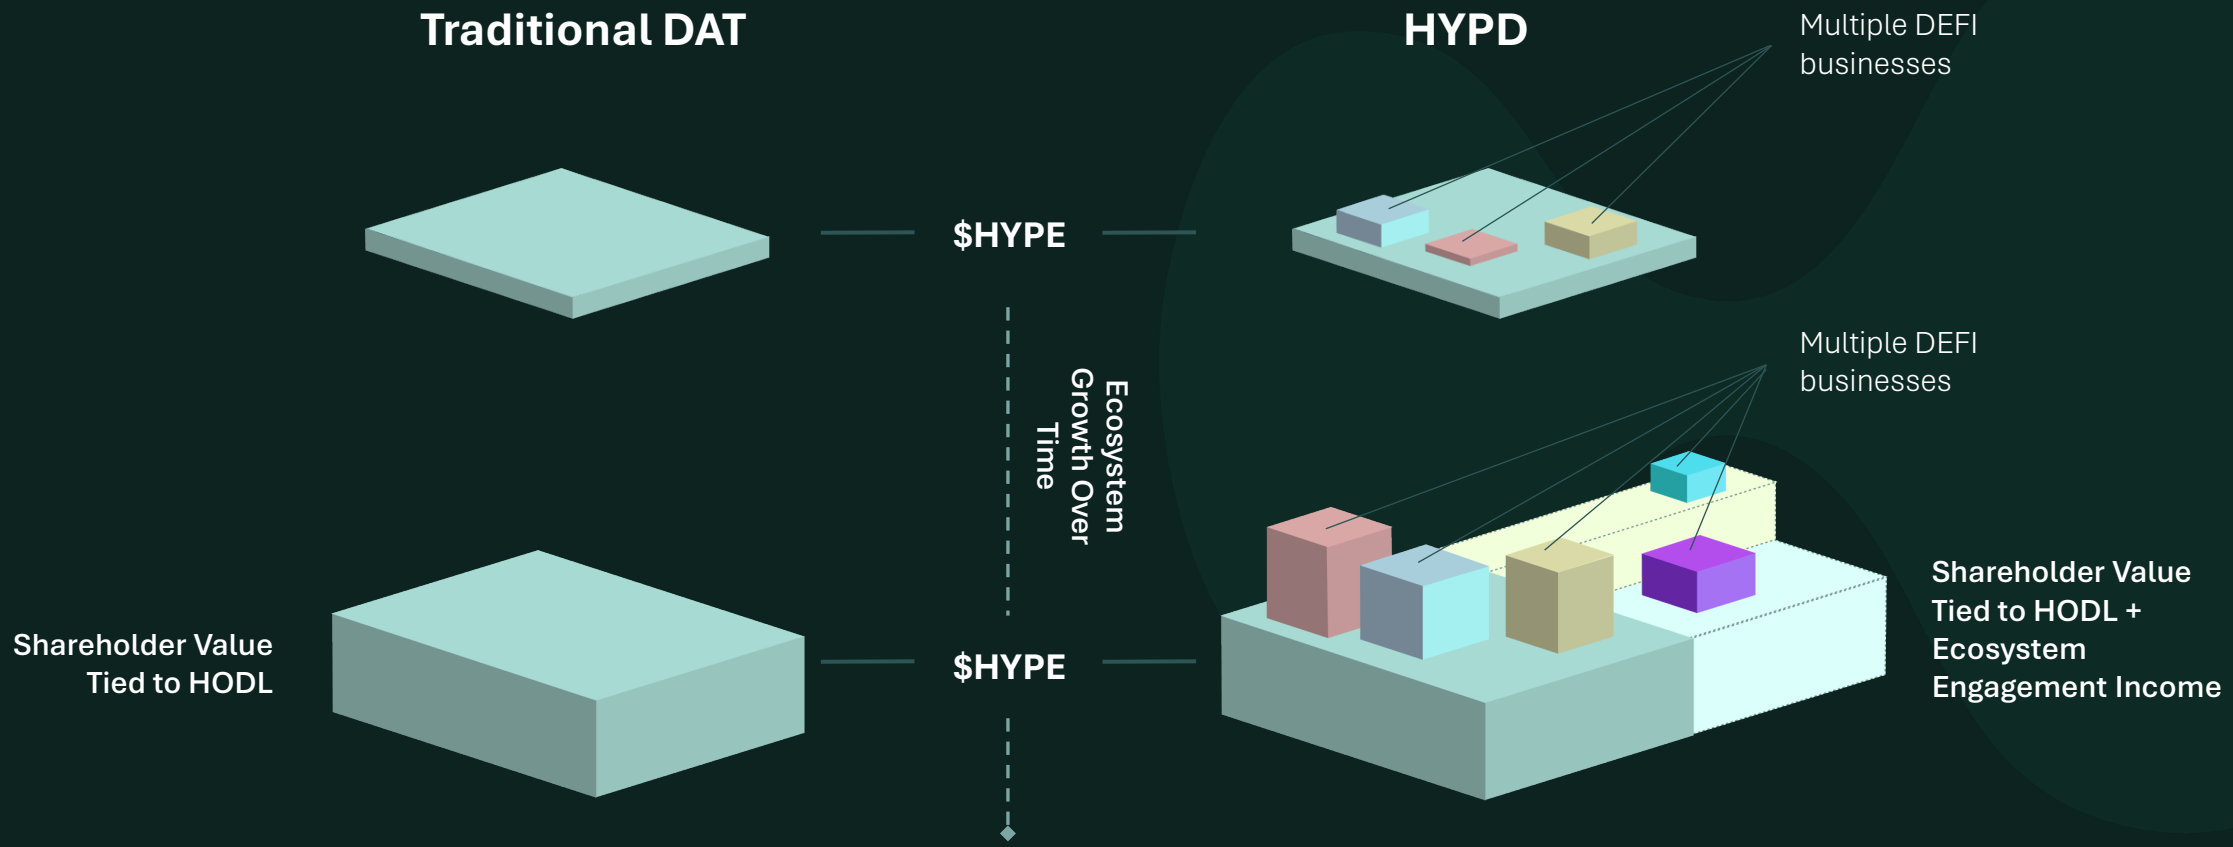

15-Month Operating Performance Demonstrates HYPD Investment Thesis

Achieved Break-Even Core Operating Earnings[19] & Adjusted Net Operating Cash Flow[18] in Q3'2026

	HYPD THESIS	FINANCIAL KPI	6/30/25	Q3 2025	Q3 2026	TOTAL CHANGE
	Growing HYPE Treasury	Gross HYPE Tokens[2]	1.31 M		1.85 M	**+41%**
+	**HYPE Token Appreciation**	Net Asset Value[9]	$41.6 M		$182.4 M	**+338%**
+	**5 Ramping DeFi Businesses**	Adjusted Gross Profit[1]		$0.4 M	$2.8 M	**+536%**
+	**Declining Costs**	Operating Expenses Excluding Stock-Based Compensation[5]		($4.3 M)	($2.2 M)	**(48%)**
+	**Improving Cash Flow**	Adjusted Net Operating Cash Flow[18]		($2.8 M)	$0.1 M	
=	**Shareholder Return**	Core Operating Earnings[19]		($3.9 M)	$0.6 M	
		Cumulative* Adjusted EBITDA[8]		$8.0 M	$90.8 M	

*Cumulative figures for Adjusted EBITDA[8] as of Q3 2025 reflect the three months ended September 30, 2025, and as of Q3 2026 reflect the fifteen months ended September 30, 2026.
Note: Net Asset Value, Adjusted Gross Profit, Operating Expenses Excluding Stock-Based Compensation, Adjusted Net Operating Cash Flow, Core Operating Earnings, and Adjusted EBIDTA are non-GAAP financial measures. See "Footnotes" and "Financial Supplement" sections for detailed definitions and reconciliations to the nearest GAAP Metric.

Hyperion's Differentiated Value Proposition vs. "Traditional DAT"

HYPD's "Triple-Dip" Deployment Creates Three Value-Creation Frontiers

Asset Value + Operating Value + Option Value = Shareholder Value

Asset Value
(1) HYPE Treasury

1.85M HYPE
~$168M as of 9/30

HYPE Price of 90.8 is +$94M vs. our basis price of 40.0 / $74M[14]

$182M
Net Asset Value[9], including
$15M Cash & Stablecoins[16]

All Legacy Debt Retired In Q3'26; Commenced Share Buybacks

HYPE Token Treasury at Significant Gain vs. Basis

Operating Value
(2) DeFi Businesses

- Institutional Validator
- Permissionless Markets
- On-Chain Institutional Lending Pools
- Vault Infrastructure
- RFQ/Shielded Trading
- Data Services

About Hyperion DeFi

THE PROBLEM

Every financial service already exists.
It just lives with a different team, on a different protocol.

The Cost of Scattered Layers

01 Separate diligence, contract and risk review per partner

02 Different collateral, settlement and oracle standards

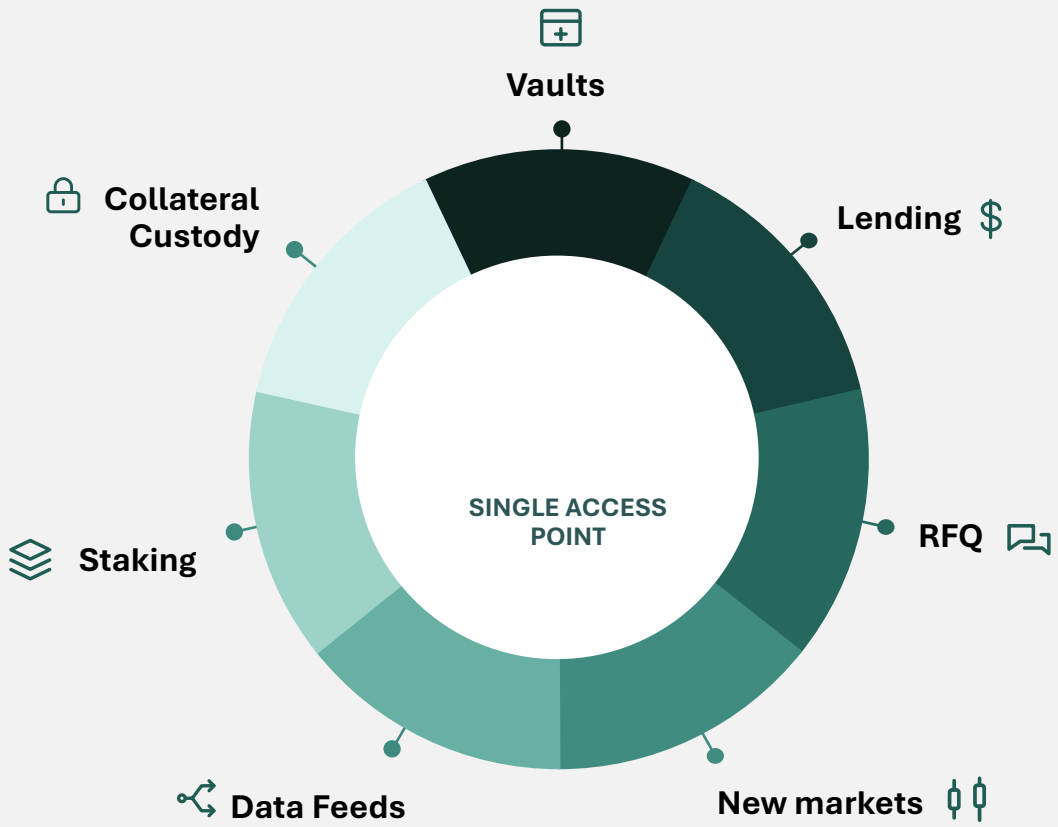

03 Months of coordination before a single product ships

04 No one is accountable for the end-to-end structure

→ **Institutions need one partner to run their best TradFi plays on Web3**

THE SOLUTION

We structure the fragmented layers into one institutional infrastructure layer.

How We Solve Fragmentation

01 · STRUCTURE

Select and align

We source the infrastructure you need and align collateral, settlement and risk standards into one set.

02 · BUILD

Deploy under your name

Products, markets and vaults go live in your organization’s name, distribution-ready.

03 · OPERATE

Run it end to end

On-chain infrastructure, RWA support, liquidity coordination, oracles, and performance reporting stay coordinated.

Hyperion DeFi © 2026

SERVICE MENU

We integrate partner services into a single, end-to-end path

Institutional Staking

We operate the Kinetiq x Hyperion Validator, serving clients such as Blockdaemon and Gemini with institutional Hyperliquid staking infrastructure.

MAVAN Kinetiq

Permissionless Markets

Perpetual and outcome markets on HIP-3 & HIP-4: commodities, equities, indices, prediction markets.

Skew Entropy

Lending & Earn

Income products packaged on real institutional borrowing demand.

HyperLend Anchorage Digital

Options & Vaults

On-chain vaults used as a structuring engine for options (Rysk) and Internet Domain Access (D3).

Rysk D3

RFQ & Private Execution

RFQ and block trading for size, without leaking the order book.

Silhouette

Data Services

The fastest commercially available Hyperliquid data feeds.

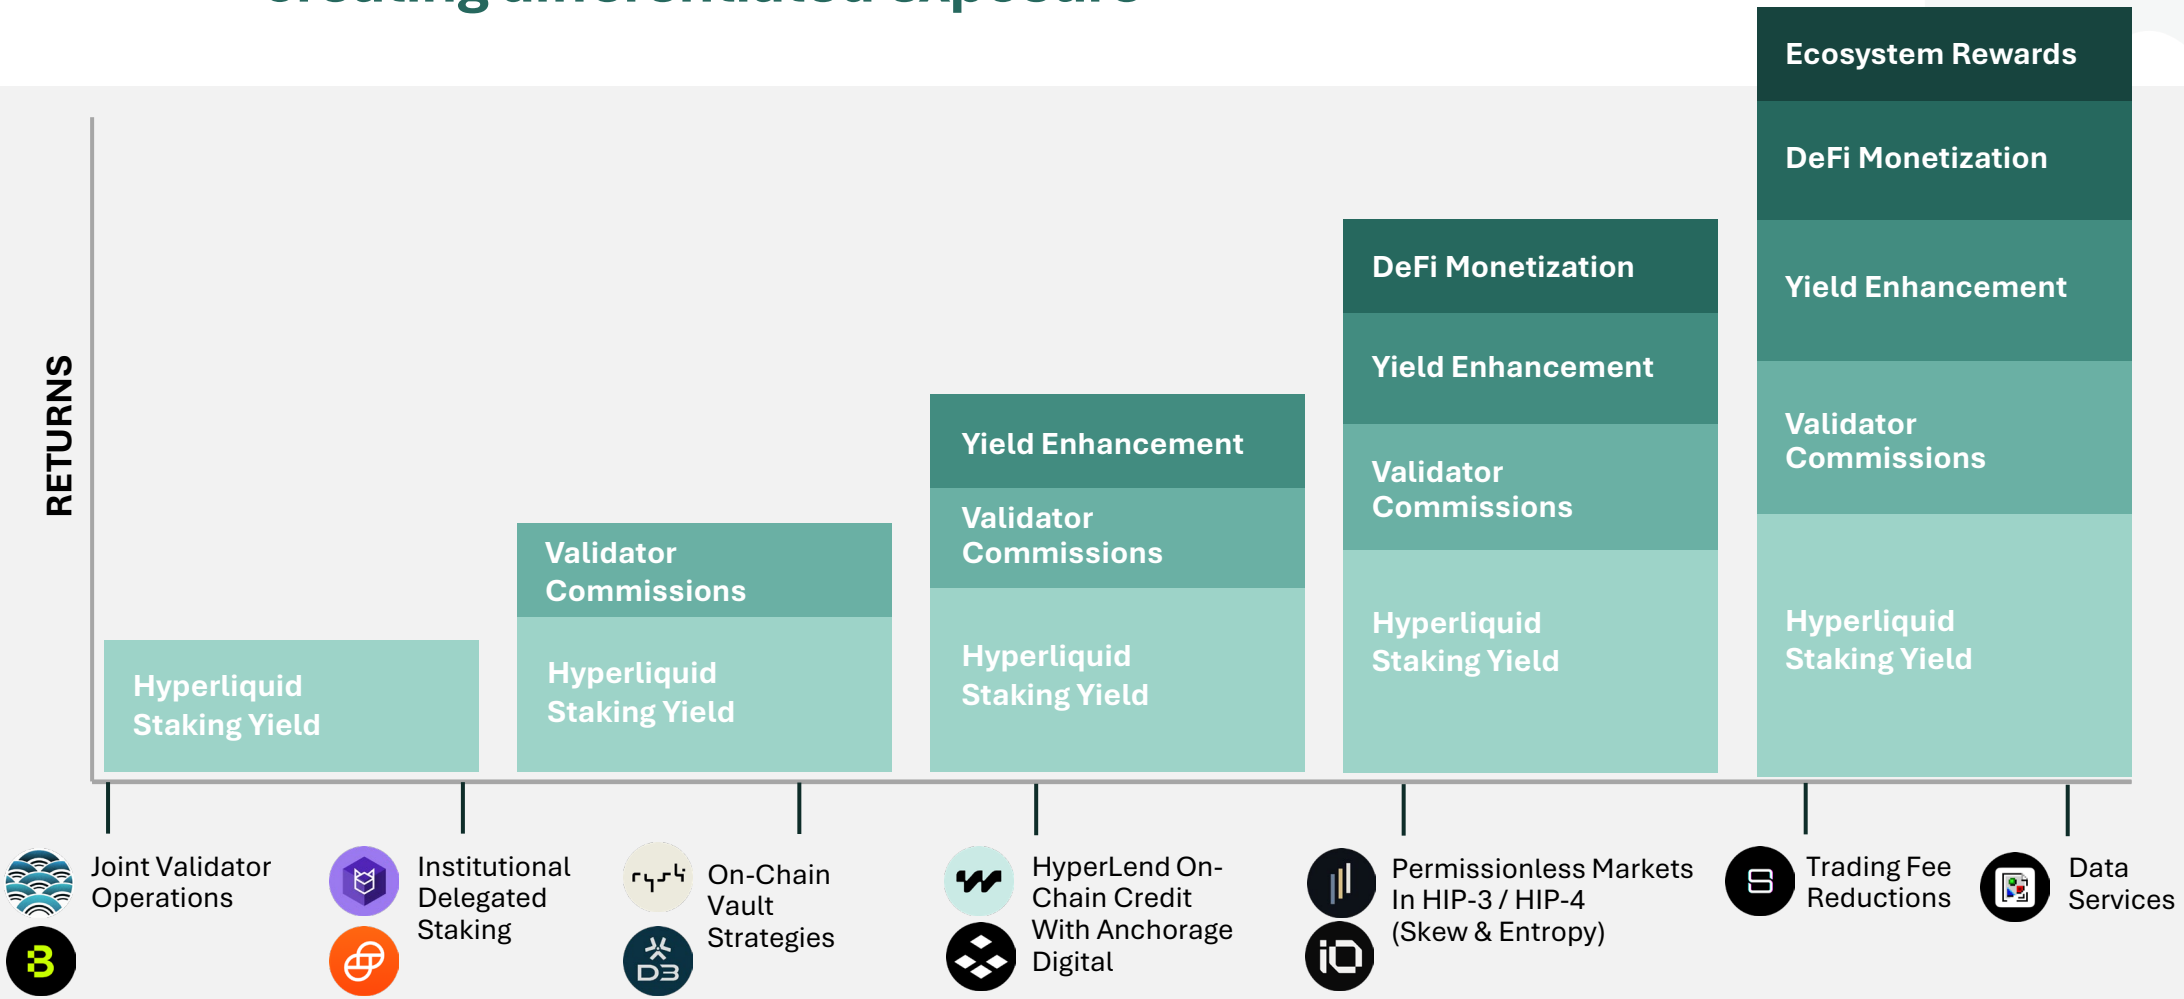

DoubleZero

THE ENABLER
HAUS

HYPE Asset Use Service. We post our own staked HYPE to work as bonded capital — unlocking unique utility across Hyperliquid and building new products for the benefit of our clients

COMPOUNDING REVENUE

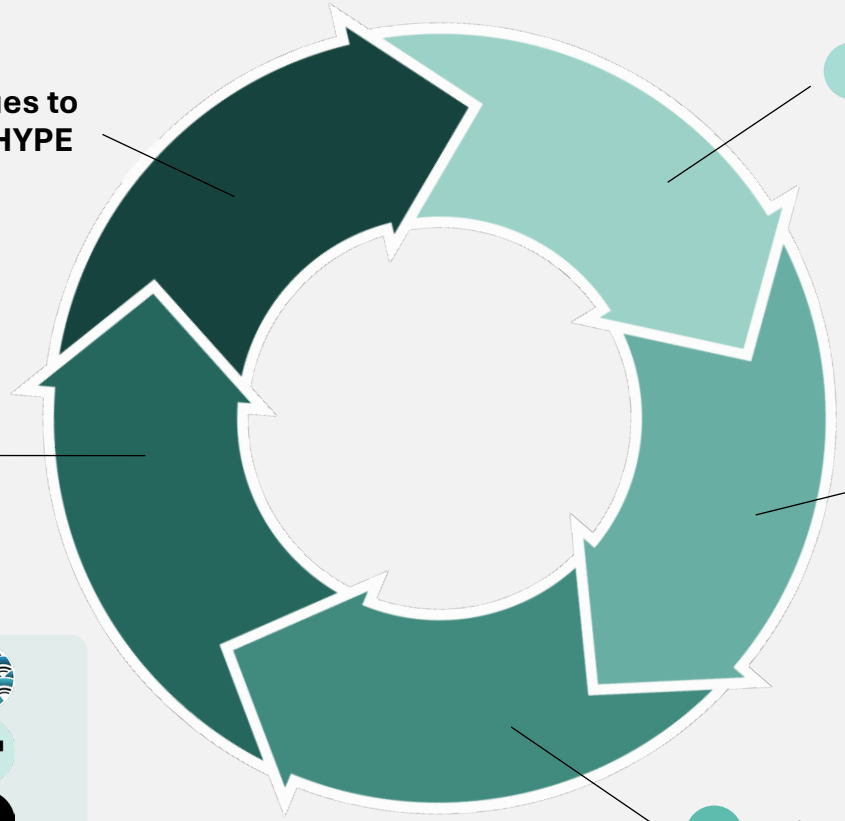

HYPD revenue streams compound, creating differentiated exposure

HYPERION DEFI'S RAPIDLY COMPOUNDING DEFI STRATEGY

FLYWHEEL EFFECT

Our flywheel drives institutional adoption of Hyperliquid

1 **Hyperion DeFi stakes and deploys HYPE into the Hyperliquid Ecosystem**

2 **Clients unlock unique utility on Hyperliquid; Hyperion DeFi earns fees from Clients**

- Reduced Trading Fees (Silhouette)
- Launch of New HIP-3 & HIP-4 Permissionless Markets (Skew & Entropy)
- On-chain credit pool (HyperLend & Anchorage Digital)
- On-chain yield vaults (Rysk and D3)
- Data Feeds (2Z)

3 **Client activity promotes broader Hyperliquid adoption**

4 **Hyperion earns USD revenue, HYPE, and Ecosystem Rewards**

- Eligible for KNTQ
- Eligible for HPL
- Eligible for Silhouette
- Eligible for Skew
- Eligible for 2Z

5 **Hyperion DeFi reinvests revenues to purchase more HYPE**

Frictionless exposure to Hyperliquid’s native token HYPE.

Access next-generation Decentralized Finance (DeFi).

Bridging public markets and on-chain strategies.

hyperion defi

More than just HYPE.

Description of Q3 2026 Digital Assets Operating Business Lines within Non-GAAP Adjusted Gross Profit[(1)]

Digital Assets Business Activity	Description
Ecosystem Rewards	5% in Skew Equity contractually owed to HYPD, plus 10 million 2Z tokens received in September 2026.
DeFi Monetization	Income in connection with the Company's temporary HYPE token use agreements, third-party fees accrued in connection with vaults and protocol activity, and accrued KNTQ staking rewards.
Yield Enhancement	The Company's first-party yield enhancement activity, including within the Hyperion Rysk Vault, and excluding third-party fees.
Validator Commissions	The Company's portion of accrued net validator commissions from the Kinetiq x Hyperion Hyperliquid Validator, which are earned in HYPE and expressed as US dollars.
Staking Yield	The Company's first-party Staking Yield on HYPE and HYPE LSTs* earned in HYPE and presented in US dollars.

*Throughout this document, LST(s) is the abbreviation for "Liquid Staking Token(s)". HYPE LSTs include HiHYPE (Hyperion Institutional HYPE), kHYPE (Kinetiq Staked HYPE), and kmHYPE (Kinetiq Market HYPE).

Note: Adjusted Gross Profit is non-GAAP financial measure. See "Footnotes" and "Financial Supplement" sections for detailed definitions and reconciliations to the nearest GAAP Metric.

Note: See “Footnotes” section for detailed explanations and definitions. The sum of individual metrics may not always equal total amounts indicated due to rounding.

Footnotes

Footnotes

1. “Adjusted Gross Profit” is a non-GAAP measure. Adjusted Gross Profit is defined as all in-period gross profit generated by the Company’s operations excluding gains and losses on its digital asset treasury. Such operating activities include staking yield, validator operations, yield enhancement activity, DeFi monetization, ecosystem rewards, and (prior to 2026) life sciences operations. It is reconciled to the GAAP measure “Gross Profit” by adding (i) accumulated but unrealized staking yield on LSTs, (ii) net gains on derivative instruments, (iii) the portion of treasury gains (losses) attributable to derivative activity, (iv) accumulated but unrealized yield enhancement activity as further described in Footnote 15, (v) income from airdrops, (vi) the impact of upfront receipt and recognition of Company’s HPL tokens, 2Z tokens, and equity in Skew Technologies, Inc. ("Skew") pursuant to its strategic agreements with HyperLend, DoubleZero Foundation (“DoubleZero”), and Skew, respectively, (vii) the impact of a one-time grant from the Felix Foundation (“Felix”) in connection with the USDH stablecoin sunset (committed in June 2026 and received in July 2026), and (viii) the portion of interest income generated from digital assets receivable. We believe Adjusted Gross Profit is a helpful financial measure to our management and investors as it aims to capture all in-period gross profit generated by our active operational strategies without the impact of (i) the temporary GAAP earnings volatility of token to LST conversion and reconversion, (ii) the temporary GAAP earnings volatility of depositing and redeeming USDH/USDC versus Hyperion Rysk Vault Shares and delays in recognition of upfront received premium on expired sold put and call options on the price of HYPE, (iii) the over-time GAAP recognition of the Company’s receipt of HPL and 2Z tokens as well as Skew equity, (iv) the timing delay between commitment and receipt of a grant from Felix, (v) dispersed GAAP presentment of our operational strategies across various Statements of Operations sections, or (vi) the impacts of gains and losses on our digital asset treasury. We believe Adjusted Gross Profit is a critical metric to quantify and compare our core operational activities between periods. In the Company’s earnings release and earnings supplement for three months ended September 30, 2025 and December 31, 2025, we previously reconciled Non-GAAP “Adjusted Gross Profit” to GAAP “Revenue”. Given changes in GAAP presentment related to staking and validating activities, we believe for quarterly presentment periods in 2026, the closest comparable GAAP metric to Adjusted Gross Profit is Gross Profit.

2. The following are unaudited supplemental operating disclosures: Gross HYPE Tokens, the number of HYPE tokens staked at the Kinetiq x Hyperion Validator, Validator Commissions in HYPE, Staking Yield in HYPE (which includes accrued staking rewards on HYPE LSTs), and HYPE Earned in Staking & Validating (which includes accrued staking rewards on HYPE LSTs).

3. Calculated as the sum of the in-period Non-GAAP Adjusted Gross Profit components of (a) Validator Commissions plus (b) Staking Yield (such figures being expressed in-period in US Dollars), divided by the sum of (a) Validator Commissions in HYPE plus (b) Staking Yield in HYPE.

4. “Gross HYPE Holdings” is a non-GAAP measure. Gross HYPE Holdings is defined as the gross market value of the Company’s HYPE assuming (a) all temporary HYPE token use agreements are exited, (b) all collateralized OTC HYPE derivatives are exited (and any HYPE or HYPE LST collateral is returned to the Company), and (c) all HYPE LSTs are converted back to HYPE tokens as of the end of each respective reporting quarter. It is reconciled to the GAAP measure “HYPE digital assets” by adding (i) HYPE digital assets receivable (without subtracting allowance for credit loss or unamortized nonrefundable upfront fees), (ii) HYPE digital intangible assets receivable (without subtracting allowance for credit loss), (iii) HYPE LSTs at carrying value (including without limitation HiHYPE, kHYPE, and kmHYPE) and (iv) the unrealized accretion (dilution) expected upon LST to HYPE reconversion as of the end of each respective reporting quarter. We believe Gross HYPE Holdings is a helpful non-GAAP financial measure to our management and investors because it eliminates the temporary HYPE value impacts caused by our DeFi Monetization and Yield Enhancement token movements as well as the conversion and reconversion between HYPE tokens and LSTs, which (a) causes staking yield on our HYPE LSTs not to be recognized in-period in accordance with GAAP and (b) does not recognize upward mark-to-market movements in underlying HYPE tokens given LSTs are carried at the lower of cost basis or impaired value. As such, it provides useful information about our balance sheet, allows for greater transparency with respect to important metrics used by our management for financial, risk management and operational decision-making, and provides an additional tool for investors to understand and compare our operating results across reporting periods.

5. "Operating Expenses Excluding Stock-Based Compensation" is a non-GAAP measure. Operating Expenses Excluding Stock-Based Compensation is defined as the Company's operational expenses in-period excluding treasury value movements, stock-based compensation, and impairment of right of use assets. It is reconciled to the GAAP measure “Selling, general and administrative expense” by (i) subtracting stock-based compensation expense and (ii) adding research and development expense. Operating Expenses Excluding Stock-Based Compensation provides a metric of total operating expenditures in-period without the impact of treasury value movements, stock-based compensation, or impairment of right of use assets, thereby creating a helpful metric for operational expense comparisons between different periods for our management and investors.

6. "Treasury Gains (Losses)" is a non-GAAP measure. Treasury Gains (Losses) is defined as the gross value change in the company's digital asset treasury portfolio each period, adjusting for temporary GAAP impacts due to native token to LST conversion (or LST to native token reconversion) and not including the Company's in-period operational activities (as captured in Adjusted Gross Profit described more fully in Footnote 1). It is reconciled to the GAAP measure “Net Operating Income (Expenses)" by (a) adding (i) research and development expense, (ii) selling, general, and administrative expense, (iii) impairment of right of use assets, (iv) provision for credit losses, and (v) the in-period change in unrealized accretion (dilution) expected upon LST to native token reconversion (including HYPE LSTs beginning in Q3’25 and KNTQ LSTs beginning in Q3’26), and (b) subtracting (i) accumulated but unrealized staking yield on LSTs, (ii) income from airdrops, (iii) realized gains and losses from Rysk Vault shares redemption, (iv) net gains on derivative instruments, and (v) treasury value changes attributable to derivative activity (which are already captured in the Non-GAAP metric “Adjusted Gross Profit”). Following these adjustments, Treasury Gains (Losses) is a singular metric that can present treasury value changes in isolation, which we believe is a helpful metric for management and investors given our large digital asset treasury position and the volatile nature of our digital assets.

7. "Adjusted Other Income (Expense)" is a non-GAAP measure. Adjusted Other Income (Expense) reflects management’s view of recurring activities outside of core operating income and operating expenses. It is reconciled to the GAAP measure "Total Other Income (Expense), Net" by (a) adding back (i) interest expense, (ii) non-recurring gains and losses from reductions in legacy liabilities, and (iii) other non-recurring items which we do not consider material in nature, and (b) subtracting the portion of GAAP “Interest Income” generated from digital assets receivable. The items added back to Adjusted Other Income (Expense) are excluded because they are non-cash in nature, or because the amount and timing of these items are unpredictable, are not driven by core results of operations, and render comparisons with prior periods and competitors less meaningful. The item subtracted from Adjusted Other Income (Expense) is already captured in the Non-GAAP metric “Adjusted Gross Profit”, as further described in Footnote 1. We believe Adjusted Other Income (Expense) provides a helpful view to management and investors regarding recurring and ongoing income and expense items outside of core operating income and expenses, presented in a way to compare these elements over time.

Footnotes (continued)

8. “Adjusted EBITDA” is a non-GAAP measure. Adjusted EBITDA is meant to reflect management’s view of recurring business activities and a more comparable view of the mark-to-market impacts on our digital asset treasury holdings in-period. It is reconciled to the GAAP measure “Net Income (Loss)” by removing (i) stock-based compensation, (ii) interest expense, (iii) provision for credit losses, (iv) income taxes, (v) depreciation and amortization expense (excluding amortization of operating lease), (vi) impairment of right of use assets, (vii) non-recurring gains and losses from reductions in legacy liabilities, and (viii) other non-recurring items which we do not consider material in nature; and, it adds in (i) the in-period change in unrealized accretion (dilution) expected upon LST to native token reconversion (including HYPE LSTs beginning in Q3’25 and KNTQ LSTs beginning in Q3’26), (ii) accumulated but unrealized yield enhancement activity as further described in Footnote 15, (iii) realized gains and losses from Rysk Vault shares redemption, (iv) the impact of upfront receipt and recognition of Company’s HPL tokens, 2Z tokens, and equity in Skew pursuant to its strategic agreements with HyperLend, DoubleZero, and Skew, respectively, and (v) the impact of a one-time grant from Felix in connection with the USDH stablecoin sunset (committed in June 2026 and received in July 2026). The items excluded from our Adjusted EBITDA are excluded because they are non-cash in nature, or because the amount and timing of these items are unpredictable, are not driven by core results of operations, and render comparisons with prior periods and competitors less meaningful. The items added to Adjusted EBITDA are included to give a more complete picture of our in-period operations and mark-to-market impacts on our digital assets, disregarding (i) the temporary GAAP earnings volatility of native token to LST conversion and LST to native token reconversion, (ii) the temporary GAAP earnings volatility of depositing and redeeming USDH/USDC versus Hyperion Rysk Vault Shares and delays in recognition of upfront received premium on expired sold HYPE put and call options, (iii) the over-time GAAP recognition of the Company’s receipt of HPL and 2Z tokens as well as Skew equity, and (iv) the timing delay between commitment and receipt of a grant from Felix. Adjusted EBITDA is used by management, in addition to GAAP financial measures, to understand and compare our operating results across accounting periods, for risk management and operational decision-making purposes. This non-GAAP measure provides investors with additional information in evaluating the Company's operating performance.

9. “Net Asset Value” is a non-GAAP measure. Net Asset Value is defined as the estimated market value of our digital assets less net outstanding debt. It is reconciled to the GAAP measure “HYPE digital assets” as adjusted to “Gross HYPE Holdings” (described more fully in Footnote 4) by (i) adding KNTQ, HPL, and 2Z digital assets at estimated market value, (ii) the value of Skew equity contractually owed to Hyperion as of its most recent raise in the three months ended September 30, 2026, (iii) adding Hyperion Rysk Vault Shares at cost basis, (iv) adding Current Assets, (v) subtracting Current Liabilities including current portion of Notes Payable, without subtracting corresponding debt discounts or any unamortized issuance expenses, and excluding Deferred Revenue, and (vi) subtracting Notes Payable (Non-current portion, without subtracting corresponding debt discounts or any unamortized issuance expenses). We believe Net Asset Value is a helpful non-GAAP financial measure to our management and investors because it provides a more complete picture of our net assets. It does not include other non-current assets or non-current liabilities beyond the aforementioned items. The Company believes Net Asset Value provides useful information about our balance sheet and financial performance, enhances the overall understanding of our past performance and future prospects, allows for greater transparency with respect to important metrics used by our management for financial, risk management and operational decision-making, and provides an additional tool for investors to use to understand and compare our operating results across accounting periods.

10. Represents in-period accrued staking yield on LSTs. Staking yield on LSTs is not recognized in-period in accordance with GAAP; instead, LST staking yield may be recognized as a realized gain upon future reconversion from LSTs back into underlying native tokens.

11. Represents the estimated future financial implications if all company-owned HYPE LSTs were reconverted to HYPE at the end of each respective period. Encapsulates both the temporary GAAP valuation methodology differences between LSTs and HYPE plus the realization of previously accrued but unrecognized staking yield on LSTs.

12. In the three months ended September 30, 2025, Gain on extinguishment of liability and a reduction in accrued liability within other income was approximately $2.2 million and $0.2 million respectively, combined totaling $2.4 million. In the three months ended March 31, 2026, gain on extinguishment of liabilities within Other income (expense), net totaled $0.2 million. In the three months ended September 30, 2026, loss on extinguishment of liabilities within Other income (expense), net totaled $0.4 million, in connection with early prepayment of the Avenue Capital loan.

13. In the reconciliation of “Total Other Income (Expense), Net” to “Adjusted Other Income (Expense)”, as well as in the reconciliation of “Net Income (Loss)” to “Adjusted EBITDA”, other non-recurring items include (a) gains and losses on sales and disposals of life sciences equipment and furniture, (b) release of reserves held against potential returns of company-sold items, (c) a one-time realized payment in connection with a terminated LOI, (d) gains and losses due to valuation differences in the time between contractual and actual delivery dates on certain company-paid expenses denominated in HYPE and in Company equity, and (e) the impact of accelerating the one-time grant from Felix Foundation in connection with the USDH stablecoin sunset (committed in June 2026 and received in July 2026).

14. Estimated and unaudited figures as of September 30, 2026.

15. Includes all net cash, cash equivalents, and USDC/USDH premiums received but unrealized on expired sold HYPE puts and calls, including within the Hyperion Rysk Vault, as well as third-party fees on yield enhancement activities (such third-party fees being included in DeFi Monetization within Non-GAAP Adjusted Gross Profit).

16. Includes assets the Company considers to be economically equivalent, but not functionally equivalent, to cash, such as USDC and USDH Stablecoin as well as deposits and redemptions from the Hyperion Rysk Vault.

17. “Adjusted Net Investing Cash Flow” is a non-GAAP measure. Adjusted Net Investing Cash Flow is defined as the estimated total net cash (including non-GAAP cash equivalents) generated from / (used for) acquisitions and dispositions of assets for investing purposes. It is reconciled to the GAAP measure “Net Cash and Cash Equivalents Provided By Investing Activities” by adding the net impact of non-cash digital asset acquisitions and dispositions. We believe Adjusted Net Investing Cash Flow is a helpful non-GAAP financial measure to our management and investors because it removes the in-period cash flow volatility which can be caused by purchases and sales of and by non-cash current assets, including USDC and USDH stablecoins. The Company believes Adjusted Net Investing Cash Flow provides useful information about our financial performance and cash flows with greater transparency for investors to understand and compare our operating results across accounting periods.

18. “Adjusted Net Operating Cash Flow” is a non-GAAP measure. Adjusted Net Operating Cash Flow is defined as the estimated total net cash (including non-GAAP cash equivalents) generated from / (used for) the Company’s operating activities. It is reconciled to the GAAP measure “Net Cash and Cash Equivalents Provided By Operating Activities” by (a) subtracting the net impact of non-cash digital asset acquisitions and dispositions and (b) adding quarterly variance in assets the Company considers to be economically equivalent, but not functionally equivalent, to cash (including from time-to-time USDC and USDH stablecoins as well as deposits and redemptions from the Hyperion Rysk Vault). We believe Adjusted Net Operating Cash Flow is a helpful non-GAAP financial measure to our management and investors because it removes the in-period operating cash flow volatility which can be caused by the inflows and outflows of non-GAAP current assets functionally equivalent to cash.

19. “Core Operating Earnings” is a non-GAAP measure. Core Operating Earnings is defined as all in-period gross profit less operational expenses incurred by the Company excluding gains and losses on its digital asset treasury, stock-based compensation, and impairment of right of use assets. It is reconciled to the GAAP measure “Gross Profit” as adjusted to non-GAAP “Adjusted Gross Profit” (described more fully in Footnote 1) by (i) adding selling, general and administrative expense, (ii) subtracting stock-based compensation expense, and (iii) adding research and development expense. Core Operating Earnings provides a metric of total operating earnings in-period without the impact of treasury value movements, stock-based compensation, or impairment of right of use assets. We believe Core Operating Earnings is a helpful metric to our management and investors to compare core operating activity across periods.
